PROFESSIONAL SUMMARY

I am a goal-oriented Web Developer with a strong academic foundation in Computer Applications, holding both a Bachelor's and Master's degree. I excel in communication, problem-solving, and leadership. My expertise spans programming, data structures, algorithms, and software development. I have developed projects like an Attendance Management System and Amazon website clone, leveraging modern technologies to solve real-world challenges. Additionally, I have completed full-stack web development training, equipping me to design and deploy dynamic web applications with a focus on quality and efficiency. And currently working on a real-time chat application.
